# Your clients give you 5 stars. Does the internet show that?

This is the **Customer view**: I looked at R&R Custom Home Remodeling the way a new client would. First what people say on Google, then what they find when they look for your website. Here is what I found.

GOOGLE × WEBSITE

## What clients say and what the internet shows

**On Google, clients rate you**

**5** ★ stars on Google

★ ★ ★ ★ ★

Every one of those stars was earned in person. That trust is your strongest asset.

POINTS MAPPED FOR R&R CUSTOM HOME REMODELING

## I found 12 points. I unlocked 3 to get you started.

**3 of 12** points unlocked in this diagnosis

1 UNLOCKED

### It's hard to use on a phone

Most visits come from phones. Small text and zooming in make people leave in seconds.

2 UNLOCKED

### Your best work isn't on the first screen

Visitors decide in about three seconds. The first screen should show your results, not generic text.

3 UNLOCKED

### The site doesn't match the trust of your reviews

Someone who arrives from your 5-star reviews expects the same quality. An outdated site makes them doubt what they just read.

HOW I SOLVE THIS FOR YOU

## From diagnosis to a website that brings clients

1

### Strategy for your business

I define with you what makes R&R Custom Home Remodeling different and what your clients search for before they choose. Everything else is built on that.

2

### A custom, animated website

Design and copy made for you, fast and beautiful on phones, with your best work on the first screen. You approve everything before it goes live.

3

### Trust from the first click

Your Google listing points to the new site, and the trust from your reviews continues there: real photos, testimonials and the people behind the work.
