Your clients give you 5 stars. Does the internet show that?

This is the **Customer view**: I looked at R&R Custom Home Remodeling the way a new client would. First what people say on Google, then what they find when they look for your website. Here is what I found.

What clients say and what the internet shows

On Google, clients rate you

5 ★ stars on Google

★★★★★

Every one of those stars was earned in person. That trust is your strongest asset.

On Google you have 5 stars, which means people who come to you leave happy. That's what makes someone trust you with their home. But when I opened your website, it still runs on a free Wix address.

POINTS MAPPED FOR R&R CUSTOM HOME REMODELING

I found 12 points. I unlocked 3 to get you started.

3 of 12 points unlocked in this diagnosis

1 UNLOCKED

It's hard to use on a phone

Most visits come from phones. Small text and zooming in make people leave in seconds.

2 UNLOCKED

Your best work isn't on the first screen

Visitors decide in about three seconds. The first screen should show your results, not generic text.

3 UNLOCKED

There's no clear next step

No obvious button to book, call or ask for a quote, so interest turns into nothing.

HOW I SOLVE THIS FOR YOU

From diagnosis to a website that brings clients

1 **Strategy for your business**

I define with you what makes R&R Custom Home Remodeling different and what your clients search for before they choose. Everything else is built on that.

2 **A custom, animated website**

Design and copy made for you, fast and beautiful on phones, with your best work on the first screen. You approve everything before it goes live.

3 **Connected to Google**

Your Google listing points to the new site, with a clear button to book or ask for a quote, so the trust from your reviews turns into contacts.
